ACTA PALAEONTOLOGICA SINICA Vol. 12, 1964

CONTENTS

No. 1

New Cretaceous Conchostraca from Jilin and Heilongjiang ······················ *W. T. Chang* & *P. C. Chen* (11)

Some Bryozoans from the Upper Devonian of Changyang, Western Hupeh ··············· *Yang King-chih* (29)

The Middle and Upper Devonian Ostracoda from Dushan and Douyun, S. Kweichow···*Shi Cong-guang* (50)

On the Occurrence of *Halobia* fauna from the Ganzi region, Western Sichuan (Szechuan) and its Significance····································*Chen Chu-chen* (75)

Брахиоподы турнейского яруса нижнего карбона юго-восточного гуйчжоу ··················*Ян Ши-пу* (100)

Jangziceras——a new Silurian Nautiloid genus ······································*Lai Chai-geen* (124)

Некоторые новые материалы Наутилоидей из Евашаньского и Ботаского известняка···*Чжан Жи-дун* (133)

Some Devonian and Carboniferous Fishes from South China ······························*P'an Kiang* (159)

Book review

Вологдин, А. Г., Древнейшие водоросли СССР ···*Юань Кэ-синь* (184)

No. 2

Late Jurassic—Early Cretaceous Belemnites from Southern Tibet, China ································ *Yang Tsun-yi* and *Wu Shun-bao* (200)

Middle and Upper Carboniferous Fusulinids from Jiangyou district, Northwestern Szechuan ··············· *Chang Lin-hsin* (228)

Yushanograptus, a new Graptolite genus from the Ningkuo Shale (Lower Ordovician) of Yushan, Northeastern Jiangxi (Kiangsi)··································*X. Chen*, *X. R. Sun* and *N. R. Han* (239)

Ostracods from Gansen District, Chaidam Basin ··································*Huang Bao-ren* (256)

Некоторые материалы по остракодам из Гуанъюанской серии в провинции Сычуани···*Хэ Цзюнь-дэ* (276)

Stromatoporoids from the Early Carboniferous of Kwangsi and Kueichow ·················*Dong De-yuan* (292)

Notes on some marine early Triassic Lamellibranchiata From east Tsinling, Southern Shanxi (Shensi) ····································· *L. Liu* (321)

Some Lower Carboniferous Straight Nautiloids from Hunan and Kansu ·····················*Lai Chai-geen* (334)

New finds of *Mariopteris* remains from China ···································*Lee Hsing-hsüeh* (344)

Несколько новых ископаемых древнейших водорослей из докембрийских отложений Китая и их стратиграфическое значение ··································*Цао Жуй-цзи* (360)

No. 3

Some species of *Tetragraptus* from the Ningkuo Shale (Lower Ordovician) of Zhejiang (Chekiang) ······································ *M. Y. Geh* (391)

Brachiopod fauna of the Nanpanjiang Limestone of Eastern Yunnan and its Geological Age ······································ *Hou Hung-fei* and *Xian Si-yuan* (419)

Upper Triassic and Middle Jurassic Ostracods from the Ordos Basin·······················*Zhong Xiao-chun* (448)

On the discovery of Eifelian Fauna from Western Tsinling············*Jian Wan-chou* and *Kuo Yong-ling* (480)

A Preliminary report on Sporae dispersae from the Lower Shihhotze Series of Hokū District, NW Shansi··································· *Ouyang Shu* (512)

New techniques

New technique for cleaning fossils···*T. F. Wang* (536)

No. 4

Upper Ordovician Trilobite faunas of Szechuan-Kweichow with special discussion on the classification

and boundaries of the Upper Ordovician··············S. F. Sheng (553)
О находках и значениях представителей *Conchidiella* взападной части провинции Гуйчжоу ············
··············*Хоу Хун-фей* и *Сюй Гуй-жун* (582)
Табуляты раннело века среднего девона в районе Эрланьшань западной часть пров. Сылуань ······
··············*Чи Юн-и* (604)
On the Trilobites from the Lower Cambrian Changping formation and their stratigraphical significance
··············*Hsiang Lee-wen* and *Kuo Zhen-ming* (624)
Some Lower Silurian Graptolites from Anji, Northwestern Zhejiang (Chekiang) ········ *Yang Da-quan* (633)
A new Multiramous Graptolite from Ningkuo Shale of Zhejiang··············*Y. T. Zhao* (640)

Scientific note

On the Occurrence of *Alloiopteris* in China··············*X. H. Zhao* (648)

Review

Hill, D.: Possible intermediates between Alcyonaria and Tabulata, Tabulata and Rugosa, and Rugosa and Hexacoralla··············*X. Y. He* (649)
